

Abstract

For the space-saving packing of individual objects supplied one behind the other, it is proposed to introduce these objects between two bands and to wind up these bands under tensioning onto a core. If the objects are compressible objects, they may be compressed in the process, with the result that the amount of space required is further reduced.

(54) Title: METHOD AND DEVICE FOR PACKING OBJECTS

(54) Bezeichnung: VERFAHREN UND VORRICHTUNG ZUM VERPACKEN VON GEGENSTÄNDEN

(57) Abstract: In order to reduce the space required for packing successively delivered individual objects, said objects are interwoven between two strips and said strips are wound onto a core while being tensed. If said objects are compactable, the objects can be compacted during said process such that the required space is further reduced.

**(57) Zusammenfassung:** Zum Platz sparenden Verpacken von einzelnen hintereinander angelieferten Gegenständen wird vorgeschlagen, diese zwischen zwei Bänder einzufädeln und diese Bänder unter Spannung auf einen Kern aufzuwickeln. Wenn es sich bei den Gegenständen um komprimierbare Gegenstände handelt, können diese dabei komprimiert werden, so dass der benötigte Platz weiter verringert wird.
